GLONASSSoft

GLONASSSoft Company

GLONASSSoft is a manufacturer and developer of modern equipment for monitoring equipment, as well as a developer of the transport monitoring system of the same name.

> 15
years on the market

> 3 000
partners

01. Equipment development

We develop both high-tech equipment for monitoring equipment and a vehicle monitoring system. Working in both directions allows us to create balanced and comprehensive products that help companies effectively manage their fleet, increasing safety and optimizing costs.

> 15 000
Users in the system

> 200 000
Objects in the monitoring system

> 150 000
UMK terminals released

02. Production

Thanks to experienced employees and modern high-precision equipment, sterile conditions and a multi-stage control system, we achieve the highest quality products in a reasonable time.
